LUBRICATION MANAGEMENT MADE EASY.

Bulk Storage

Clean, safe, professional storage and handling of bulk lubricants that drives workplace organization and establishes best practices. Efficient, Compliant, Scalable, and Configurable.

- Choice of 4 Aluminized Steel Tank sizes: (30, 65, 120, and 240 gallons).
- Choice of 10 Tank Colors & Identification Labeling – use colors and labels as part of lubricant identification convention to meet safety compliance.
- Spill Control – all systems come standard with integrated spill pans for SPCC compliance.
- Fire Suppression – fusible link tank isolation valves and auto-shut off taps.
- Filtration – each tank includes fluid filtration capability with a choice of micron rating 25um, 7um, 4um, and desiccant air breathers.
- Accommodate lubricants up to ISO 680.
- Available in electric and pneumatic configurations.
- All systems ship in full assembled pods – for efficient freight and rapid onsite installation.
- Transport – all systems have integrated spill transport pallets for easy forklift and hand truck access and workplace mobility.

Transfer Containers

Precise-pour transfer containers eliminate spills and slowdowns.

- Ergonomic hand pumps.
- Push-button air intake valves.
- Quick twist spouts for fast, smooth pumping and pouring.
- Fully interchangeable drums and lids.
 - 10 different colors
 - Drum sizes: 1.5, 2, 3, 5, and 10 Liter/US Quart
 - Lid styles: Stumpy, stretch, mini, utility, and storage spout
- Robust design for extensive service life.

Label Identification

Customizable labels integrate the entire system to ensure every lubricant goes in the right place – from Bulk Storage to the Transfer Container to the point of application.

- Fully customizable content.
- Meets OSHA compliance with Right to Know.
- Improves productivity and efficiency.
- Variety of label sizes and media to meet all of your identification needs.

OilSafe® is the reliable choice for safe, compliant, and organized -storage -transfer and -identification.

The OilSafe lubrication management system establishes best practices throughout your workflow, from bulk storage to point of use. Every step is color-coded to eliminate risk and human error - simplifying maintenance, while extending the life of fluids and equipment that keep your business running.
