

USED OIL COLLECTION & DISPOSAL

OilSafe's contamination control measures do not end with new industrial fluids; this product line takes best practices with contamination and safety measures to another level by offering the ability to recycle/dispose of used oils through Used Oil Skids. These skids have a capacity of 120 or 240 gallon sizes and allow for full containment in a single location.

Each system is housed in a spill containment pallet and includes:

- Identifiable white tank with a level indicator
- ½" male quick disconnect for transferring the oils into the tank
- Funnel for pouring oils in and draining filter elements with flame arrestor and auto-close lid in the event of fire
- 1½" camlock access for bulk truck servicing
- Forklift and pallet jack access to all 4 sides
- 4 leveling feet
